- Web and UI design
- Image editing/retouching
- Typography
- Motion Graphics
- Print design

#### Technologies

- Adobe Creative Suite  
(InDesign, Photoshop, Illustrator, After Effects, XD)
- UXPin
- Figma

### ABOUT ME

I am a full-stack developer and designer, and throughout my career I've been guided by these twin passions. I've loved coding since I was a boy writing text adventures in BASIC, and have always enjoyed the unique mix of creativity and problem-solving it requires. I have a degree in Computer Science, and have recently graduated from Northcoders coding bootcamp, where I've relished the challenge of mastering new, exciting technologies.

I also have over fifteen years' experience working in graphic design, creative skills I will bring to any future role, building beautiful websites and applications that excite and inform their users.

### EXPERIENCE

#### PERSONAL PROJECTS

January 2021 - Present

- Since graduating Northcoders I've continued to expand my skills in React, React Native and JavaScript, through online courses and personal projects.
- Personal project: Sticks + Stones**
  - A hangman game built with React, Styled Components, React Transition Group and HTML canvas.
  - Visit: [sticksandstones-jc.netlify.app](https://sticksandstones-jc.netlify.app)
  - GitHub: [github.com/jimwcollins/sticksandstones](https://github.com/jimwcollins/sticksandstones)
- To further challenge myself, I've also embarked on a Udemy course on game development with C++ and Unreal Engine 4.

#### TRAINEE DEVELOPER • Northcoders

September 2020 - January 2021

- Northcoders was a challenging but immensely rewarding programme, teaching full-stack software development using in-demand technologies including: JavaScript, React, Express and SQL.
- Throughout the course we employed industry best-practice, including version control with Git, test-driven development, and pair-programming (in person and remote).
- Northcoders project: Meme What You Say**
  - A real-time, multiplayer iOS caption game built with React Native and Google Firebase.
  - Visit: [james-collins.netlify.app/pages/projects/meme.html](https://james-collins.netlify.app/pages/projects/meme.html)
  - GitHub: [github.com/jimwcollins/meme-game](https://github.com/jimwcollins/meme-game)

## EDUCATION

### NCTJ JOURNALISM

Harlow Journalism Centre

January 2003 – July 2003

- A journalism course with a focus on magazines, accredited by the National Council for the Training of Journalists and the Periodicals Training Council.
- Distinction grades awarded for design, subediting and feature writing.

### BSc COMPUTER SCIENCE

University of Nottingham

September 1996 – June 1999

- A challenging, forward-thinking course covering concepts such as object-oriented programming, functional programming, user interface design and databases.
- Languages included Java, C++, HTML and SQL.

### 3 A-LEVELS • 10 GCSES

1992 – 1996

Quinton House, Northampton

## INTERESTS

Art/Design

Music

Photography

Gaming

Travel

Cycling

Literature

Writing

Cinema

## EXPERIENCE CONTINUED

### ○ Northcoders project: The Iris

- A responsive, full-stack news site built with React, Express, Knex and a PostgreSQL database.
- Visit: [the-iris.netlify.app](https://the-iris.netlify.app)
- GitHub: [github.com/jimwcollins/iris-fe](https://github.com/jimwcollins/iris-fe)

### ● PERSONAL PROJECTS

January 2020 – September 2020

- Seeking a new challenge, I began relearning web development. This reignited my love of coding and inspired me to enrol in Northcoders.
- I completed Udemy courses in HTML, CSS and responsive design; JavaScript; After Effects and motion graphics.
- Personal project: Portfolio website
  - Built with HTML, CSS, Flexbox, CSS grids and JavaScript.
  - Visit: [james-collins.netlify.app](https://james-collins.netlify.app)
  - GitHub: [github.com/jimwcollins/portfolio](https://github.com/jimwcollins/portfolio)
- I also fulfilled a lifelong dream and completed my first novel.

### ● FREELANCE DESIGN

September 2007 – December 2019

- Freelance design for clients including Classic FM, XFM, Pan Macmillan and Chickenshed.
- Sole responsibility for the complete design cycle, from initial concept and design through to picture research, page layout and the production of print-ready PDFs.
- Extensive use of Photoshop to manipulate/retouch images.
- Close collaboration with clients.

### ● DESIGNER • Think Publishing

October 2003 – August 2007

- Design of magazines, books and advertisements for clients including the Ramblers' Association, the Campaign to Protect Rural England and the Department for Transport.
- Working individually and in collaboration with the design, editorial and advertising sales teams.

### ● WEBSITE DEVELOPER • Quidnunc

September 1999 – September 2002

- Key team member developing websites for clients including M&S and the University of Cambridge.
- I was also a member of the client technical support team, dealing with challenging and often time-critical issues.
- Extensive use of HTML, SQL and Java.
